

Work faster and protect
your devices.

DEDICATED ACCESSORIES FOR ZEBRA DEVICES

Carrying cases - work smarter & faster.

Our textile carry cases not only protect your devices, but also make your daily work easier. Thanks to a variety of configuration options, we can offer a solution well suited to the requirements of each business.

A new way to use your device

Scan barcodes and keep your hands free the rest of the time. Use our wearable cases to work more efficiently and comfortably.

Perfect fit

We do not manufacture universal cases. We provide a unique case for each device model. This guarantees a perfect fit for your Zebra devices.

Easy access to key features

Our cases provide easy access to key device functions. This means that you don't have to remove the case to use the most important buttons, connection or cameras/scanners.

Durable and reliable

We use precise sewing technology that guarantees a high quality finish. Our cases are made of carefully selected materials that look great and fit well in your hand.

Configuration options

Find the best solution for your business thanks to the different types of mounts available in our cases. You can also choose the material depending on your stylistic and functional preferences.

We specialize in custom-made projects!

As a flexible B2B partner, we can offer new, unique solutions designed especially for your company.

Three material options

The OEM Protector textile cases are available in three material options. Depending on the type of device and the working environment, we will propose the best solution.

Diamond

Very strong hybrid material made of polyamide and polyurethane. Its texture resembles the rubber, making it easy to carry in hand.

Titan

Hybrid material made of polyamide and polyurethane. Very durable and resistant to dirt and dust.

Leather

Designed to last in difficult conditions. It does not fray at the edges and has a high tear strength. Plus, it looks elegant.

High-quality textiles

Our textiles come from high-class European producers. We choose only proven materials and we never compromise on quality.

Use with shoulder or neck straps

Each case can be optionally equipped with **metal D-Rings** - small rings that allow the device to be mounted on a strap. This is another huge upgrade for your daily work quality.

Choose a mount and additional accessories

Our cases can be equipped with optional mounting accessories. Thanks to them, carrying the device is even easier.

Belt clip

Clip mounting is the basic way of attaching device to any belt or pocket. Simple and quick solution.

Swivel Mount

Swivel mount lets you quickly attach and detach the device. Just rotate it 90 degrees to lock/unlock. This mount can be used with belt adapters or arm mounts (sold separately).

360 Mount

The integrated 360-mount mount allows the device to be attached and rotated freely. It is delivered with a special adapter attached to a belt or pocket.

Wrist mount with swivel mount

This accessory is extremely practical for smaller devices like e.g. Zebra TC21. It allows you to quickly mount the mobile computer on your wrist while leaving your hands free. ▲

Are you looking for a case for a different Zebra device?

We are constantly expanding our range of accessories. We are happy to design a new case for other Zebra devices.

Holsters - **carry** your devices with ease.

Have your electronic devices always at hand. Our holsters make it easy to carry a mobile computer or barcode scanner. Save time, work smarter and protect your equipment at the same time.

Easy carrying

Keep your hands free when you are not using the device. Just slip it into the holster and it'll be there when you need it.

Durable and reliable

Thanks to high-quality materials and advanced production technology, our holsters guarantee durability without compromise.

Device protection

Holsters help to protect your devices from bumps and scratches. Forget about accidentally dropping or losing your device.

Also for devices with a pistol grip

The unusual shape of the device is not a problem - it is a challenge. That is why we have created the holsters for pistol grip devices.

Various types of holsters

Different working conditions call for different approaches. That is why we offer three basic types of holsters. You can easily decide how you want to access your device while you work.

No fastening (pouch)

Just slide the device in or out. Recommended for a dynamic work environment.

Velcro

Classic type. Strong but easy to fasten or unfasten.

Magnet

Elegant and modern fastening. Thanks to the magnetic elements, it's very easy to lock.

Attach the holster to the forklift

Selected holsters can be equipped with holes enabling easy assembly, e.g. on a forklift post with the use of ordinary electric ties.

Made in Europe, Poland

Most of our products are manufactured locally - in northern Poland. Being so close to our factories, we can constantly monitor product quality, reduce shipping times and develop new products faster.

Wearable accessories - even **more possibilities.**

By choosing our cases or holsters, you can supplement them with additional wearable accessories. Thanks to them, you will gain even greater comfort of work and you will fully use the potential of our wearable products.

Screen protection - **no more scratches** and cracks.

Our advanced screen films are designed to protect each device from scratches and other common damage. OEMprotector offers a wide range of screen protector types.

● Easy to apply

You don't need any special tools or glue. Just remove the backing layer and place the foil directly on the screen. Then remove the front layer. And that's all!

● Perfect fit

We provide perfectly matched, laser-cut screen protectors for each device. You don't have to cut anything by yourself!

● 11 types

Our protective films are available in 11 types with different properties. We will help you choose the best solution for your company.

Special screen protectors - much more than protection.

In addition to screen films with different levels of protection, we also offer films with special functions - e.g. antibacterial or privatization films.

OEM Protector Screen Protectors Types

Basic protection

PRIME ★★★★★ ★★★★★

Standard protective film. Recommended for all the devices that require basic protection.

Strong protection

HYBRID ★★★★★ ★★★★★

Next generation hybrid PET GLASS which offers amazing protection against scratches thanks to its super thin layer similar to the true glass.

Antibacterial

HYBRID BF ★★★★★ ★★★★★

Hybrid BF is a truly elastic and ultra thin, flexible PET GLASS. New generation zinc oxide coating helps reduce nearly 99% of bacteria on the screen.

Matt

MATT ★★★★★ ★★★★★

Protective film with a special matt layer which reduces glare and fingerprints.

Privatization

PRIVATE ★★★★★ ★★★★★

Protective film equipped with a special privacy layer which hides the display from any bystanders. Works only in one horizontal or vertical layer. Reduces glare and smudges.

For curved screens

FLEXI+ ★★★★★ ★★★★★

Protective film with a special glue dedicated for curved displays. Offers edge-to-edge full protection and self-healing layer.

SCRATCH PROTECTION ★★★★★
IMPACT PROTECTION ★★★★★

PRIME+ ★★★★★ ★★★★★

Standard protective film offering additional oleophobic layer which not only protects the screen of the device but also helps to keep it clean.

HARD ★★★★★ ★★★★★

Hardened protective film offering extra protection against scratches and damages.

IMPACT ★★★★★ ★★★★★

Super tough, elastic film with supreme impact protection, shock absorption and clarity. Smooth touch makes it easy to operate the touchscreen.

NOBACTERIA ★★★★★ ★★★★★

OEMnobacteria is a durable protective film with special new generation zinc oxide coating which helps reduce nearly 99% of bacteria that accumulate on the screen.

MATT PRO ★★★★★ ★★★★★

Matt protective film. Offers full protection and reduction of reflections and fingerprints.

Take a look at your device from the side. If the screen (or its frame) is curved, you may consider choosing the Flexi + screen protector to protect the entire surface. **You can still choose the rest of our screen protectors, but only to secure the flat part of the screen.**

Rubber cases - **extra protection** with wearable options.

Stop worrying about cracks, scratches and greasy stains on your mobile computers. Our rubber cases are designed to protect your devices and save your money. Plus, we can offer additional, wearable accessories compatible with our rubber cases.

Made of elastic rubber

Our rubber protective cases are characterized by high flexibility, resistance to grease, abrasion and impact. This offers the optimal protection for your devices.

Rugged corners

The rugged corners add an extra protection to the device parts most vulnerable to damage. It's just like a car bumper!

Wearable solutions for rubber cases

Each rubber case, can be upgraded with wearable accessories. We offer hand straps, arm mounts, belt clips and other solutions, that make your everyday work easier and more efficient.

Keypad protectors - safe device disinfection.

The use of disinfectants is good for the health of employees and customers, but can be destructive to electronic devices such as data collectors. We came up with a simple and effective solution: protective films to protect the buttons.

Perfect fit

We provide a custom-made keyboard foil for each device model. You don't have to cut anything yourself - everything is ready.

Wide temperature range

Our keypad film is fully functional in any temperature from -48°C to +88°C (-54.4°F to 190.4°F). That guarantees a good protection even in the extreme conditions.

Easy removal

The film is made of an elastic material with non-marking glue. You can easily remove it when needed without leaving any long-lasting marks.
